Horseplayers get a full array of systems on speed, weight, two-year-olds, handicap races, allowances, claimers, and even money management. The book is perfect for bettors of all skill levels and styles.

The Meaning of Horses: Biosocial Encounters examines some of the engagements or entanglements that link the lived experiences of human and non-human animals. The contributors discuss horse-human relationships in multiple contexts, times and places, highlighting variations in the meaning of horses as well as universals of 'horsiness'. They consider how horses are unlike other animals, and cover topics such as commodification, identity, communication and performance. This collection emphasises the agency of the horse and a need to move beyond anthropocentric studies, with a theoretical approach that features naturecultures, co-being and biosocial encounters as interactive forms of becoming. Rooted in anthropology and multispecies ethnography, this book introduces new questions and areas for consideration in the field of animals and society.

A powerful classic that shows experienced and novice handicappers how to analyze their real winning chances when playing favorites, middles odds and longshots, and in 25 winning systems, the proper formula they need to win by betting each group. A powerful classic that shows experienced and novice handicappers how to analyze their real winning chances when playing favorites, middles odds, and longshots—and in twenty-five winning systems, the proper formula they need to win by betting each group.

The Encyclopedia of British Horse Racing offers an innovative approach to one of Britain's oldest sports. While it considers the traditional themes of gambling and breeding, and contains biographies of human personalities and equine stars, it also devotes significant space to neglected areas. Entries include: social, economic and political forces that have influenced racing controversial historical and current issues legal and illegal gambling, and racing finance the British impact on world horseracing history and heritage of horseracing links between horse racing and the arts, media and technology human and equine biographies venues associated with racing horseracing websites The Encyclopedia of British Horse Racing provides a unique source of information and will be of great interest to sports historians as well as all those whose work or leisure brings them into the world of racing.

How do the class and gender inequalities found in horseracing affect the working practices of women within the industry? Drawing on the work of Bourdieu and his concepts of field, capital and habitus, this book shows the inequalities that are prevalent within the world of racing, both historically and currently, by illustrating the classed and gendered nature of racing and how it has developed since the eighteenth century when it was the sport of the aristocracy. Using research obtained through her year-long ethnographic study of a racing yard, Deborah Butler demonstrates that the racing field is an arena of power conflicts, and that men and women who work in racing acquire a contradictorily gendered racing habitus. This is achieved by learning certain elements in a formal setting but mainly informally, by 'doing', developing practical skills and participating in a (gendered) community of practice. For female stable staff this means adapting their behaviour and working practices in order to be accepted as 'one of the lads'. This book will appeal to both scholars and students of the sociology of sport, the sociology of work and gender studies.

Horseracing, thoroughbred breeding and gambling on racing are global industries worth several hundred billion dollars. They are also industries facing serious challenges, from the rise of alternative forms of leisure gambling to concerns about the ethical treatment of animals in all equestrian sports. This book offers a broad-ranging examination of the contemporary horseracing industry, from geographical, economic, social, ethical and environmental perspectives. The book draws on in-depth, mixed-method research into the racing and breeding industries in the US, Australia, the UK, Canada and New Zealand,

and includes comparative material on other key racing centres, such as Ireland, Singapore and Hong Kong. It explores the economic structure of the global racing business, including comparisons with other major international sport businesses and other equestrian sports. It examines the social and cultural roots of the sport through its association with, and impact on, rural places, communities and environments from Kentucky to Newmarket - highlighting racing's particular blend of tradition and scientific and technological innovation. The book also explores the ethical issues at the heart of horseracing, from reproduction to the use of the whip, and the inescapable tension between the horse as an instrumentally valuable commodity and the horse as an intrinsically valuable animal with needs and interests. The Global Horseracing Industry concludes by considering alternative futures for this major international sports business. The book is illuminating reading for anybody with an interest in sport, business, cultural geography, animal studies, or environmental studies.
