## Spark Release 2.0.0 | Apache Spark

SparkSession: Prior to Spark 2.X, there were different entry points for different Spark jobs; that is, for Spark SQL we had sqlContext and if Hive features were also required then HiveContext was the entry point. With Spark 2.X this ambiguity has been removed and now we have one single entry point called SparkSession. However, it is to be noted that all the module-specific entry points are still very much around and have not been deprecated yet.
