Illustrated with 60 maps, plans and diagrams Reconnaissance and counter-reconnaissance are battlefield missions as old as military history itself and missions for which many armies have created specialized units to perform. In most cases, these units were trained, equipped, and used differently from the majority of an army's fighting units. Horse cavalry performed these missions for centuries, for it had speed and mobility far in excess of main battle units. Once the horse was replaced by mechanization, however, the mobility advantage once enjoyed by the horse cavalry disappeared. Since the early 20th century, the search for the proper mix of equipment, the proper organization, and the proper employment of reconnaissance units has bedeviled armies around the world. This survey uses a diverse variety of historical cases to illustrate the enduring issues that surround the equipping, organizing, and employment of reconnaissance units. It seems that these specialized units are either too heavily or too lightly equipped and too narrowly specialized or too conventionally organized. Pre-war reconnaissance doctrines tend to undergo significant change once fighting begins, leading to post-conflict analysis that reconnaissance units were "misused" in one way or another. McGrath ends his study with an intriguing conclusion about the role that specialized reconnaissance units should have in the future that may surprise many readers.

During WWII and throughout history, military units have needed to disguise their discussions about military assets. They developed a coded language designed to confuse the enemy if overheard or referenced on a map or other document. This book contains all the CODE NAMES and their respective UNIT DESIGNATIONS for the First U.S. Army for 1944. For history buffs and WWII enthusiasts a lot of material from this era uses coded messages without clues as to what or who they are referencing. In this book are the CODE NAMES for SHAEF, General of the Army Eisenhower down through the entire organizational structure to the unit level. Dedicated to our greatest generation, those who have served honorably in the U.S. military and to the preservation of history.

The magazine of mobile warfare.
