draws upon her understanding of the universalities of human nature to explore the ageless issues of evil, suffering and the indomitable will of the human spirit. For Kivrin, preparing an on-site study of one of the deadliest eras in humanity's history was as simple as receiving inoculations against the diseases of the fourteenth century and inventing an alibi for a woman traveling alone. For her instructors in the twenty-first century, it meant painstaking calculations and careful monitoring of the rendezvous location where Kivrin would be received. But a crisis strangely linking past and future strands Kivrin in a bygone age as her fellows try desperately to rescue her. In a time of superstition and fear, Kivrin—barely of age herself—finds she has become an unlikely angel of hope during one of

history's darkest hours. Praise for Doomsday Book “A stunning novel that encompasses both suffering and hope. . . . The best work yet from one of science fiction’s best writers.”—The Denver Post “Splendid work—brutal, gripping and genuinely harrowing, the product of diligent research, fine writing and well-honed instincts, that should appeal far beyond the normal science-fiction constituency.”—Kirkus Reviews (starred review) “The world of 1348 burns in the mind’s eye, and every character alive that year is a fully recognized being. . . . It becomes possible to feel . . . that Connie Willis did, in fact, over the five years Doomsday Book took her to write, open a window to another world, and that she saw something there.”—The Washington Post Book World

A groundbreaking history that considers the attack on Pearl Harbor from the Japanese perspective and is certain to revolutionize how we think of the war in the Pacific. When Japan launched hostilities against the United States in 1941, argues Eri Hotta, its leaders, in large part, understood they were entering a war they were almost certain to lose. Drawing on material little known to Western readers, and barely explored in depth in Japan itself, Hotta poses an essential question: Why did these men—military men, civilian politicians, diplomats, the emperor—put their country and its citizens so unnecessarily in harm's way? Introducing us to the doubters, schemers, and would-be patriots who led their nation into this conflagration,

Hotta brilliantly shows us a Japan rarely glimpsed—eager to avoid war but fraught with tensions with the West, blinded by reckless militarism couched in traditional notions of pride and honor, tempted by the gambler's dream of scoring the biggest win against impossible odds and nearly escaping disaster before it finally proved inevitable. In an intimate account of the increasingly heated debates and doomed diplomatic overtures preceding Pearl Harbor, Hotta reveals just how divided Japan's leaders were, right up to (and, in fact, beyond) their eleventh-hour decision to attack. We see a ruling cadre rich in regional ambition and hubris: many of the same leaders seeking to avoid war with the United States continued to adamantly advocate Asian expansionism, hoping

to advance, or at least maintain, the occupation of China that began in 1931, unable to end the second Sino-Japanese War and unwilling to acknowledge Washington's hardening disapproval of their continental incursions. Even as Japanese diplomats continued to negotiate with the Roosevelt administration, Matsuoka Yosuke, the egomaniacal foreign minister who relished paying court to both Stalin and Hitler, and his facile supporters cemented Japan's place in the fascist alliance with Germany and Italy—unaware (or unconcerned) that in so doing they destroyed the nation's bona fides with the West. We see a dysfunctional political system in which military leaders reported to both the civilian government and the emperor, creating a structure that facilitated intrigues and

stoked a jingoistic rivalry between Japan's army and navy. Roles are recast and blame reexamined as Hotta analyzes the actions and motivations of the hawks and skeptics among Japan's elite. Emperor Hirohito and General Hideki Tojo are newly appraised as we discover how the two men fumbled for a way to avoid war before finally acceding to it. Hotta peels back seventy years of historical mythologizing—both Japanese and Western—to expose all-too-human Japanese leaders torn by doubt in the months preceding the attack, more concerned with saving face than saving lives, finally drawn into war as much by incompetence and lack of political will as by bellicosity. An essential book for any student of the Second World War, this compelling reassessment will forever change the

He won an Emmy as part of the writing team on Veep, a BAFTA for Harry Hill's TV Burp and a Writers' Guild Award for The Thick of It. For over fifteen years, David has also hosted his own very popular quizzes at festivals, events, pubs, clubs, cinemas and in tents: the quizzes range is broad and the questions are tricky. They're not about statistics, there's no sport, the picture rounds are conceptual, and there's sometimes a round called 'Martin Amis Character or Blur Song'. Each quiz is funny and entertaining even if you don't know the answers. The quizzes are informative and opinionated. In

Some ways, they're like stand-up with questions. This is a book based on David's excellent live quizzes. David Quantick is a novelist (*All My Colours*, *Night Train*), broadcaster (Radio 2's *The Blogger's Guide*, *Front Row*, *Loose Ends*), music journalist (*NME*, *Q*, *Uncut*) and comedy writer, who hosts quizzes in his spare time. For years, David's quizzes have attracted paying customers who like to be enraged and entertained by quizzes described by many people as 'quite difficult'. But they are quizzes. Quite difficult quizzes that tax the brain and make it go in directions it didn't know it could. That's not to say the questions are fiendishly scientific and packed with questions about dates and the periodic table. They're about books and music, movies and actors, strange events and interesting quotes. You

don't leave a Quantick quiz knowing how many times Spurs have won the League, but you may know how many Shirleys have sung a Bond theme or how George V made the front page of The Times. The effectiveness of David's quizzes is down to their unusual variety and almost stream-of-consciousness leaps and bounds of factual imagination. There's not even much point in cheating, because the answers often require mental agility as well as just knowing where Calais is (it's in France, but it wasn't always, even when it was). David's quiz book includes twenty-five main quizzes, four Christmas quizzes and four specialist quizzes, so thirty-three quizzes in total. Entertaining in its own right, this is also a conceptual yet very practical guide to staging excellent quizzes of your own.

The clock is relentlessly ticking! Our world teeters on a knife-edge between a peaceful and prosperous future for all, and a dark winter of death and destruction that threatens to smother the light of civilization. Within 30 years, in the 2030 decade, six powerful 'drivers' will converge with unprecedented force in a statistical spike that could tear humanity apart and plunge the world into a new Dark Age. Depleted fuel supplies, massive population growth, poverty, global climate change, famine, growing water shortages and international lawlessness are on a crash course with potentially catastrophic

consequences. In the face of both doomsaying and denial over the state of our world, Colin Mason cuts through the rhetoric and reams of conflicting data to muster the evidence to illustrate a broad picture of the world as it is, and our possible futures. Ultimately his message is clear; we must act decisively, collectively and immediately to alter the trajectory of humanity away from catastrophe. Offering over 100 priorities for immediate action, *The 2030 Spike* serves as a guidebook for humanity through the treacherous minefields and wastelands ahead to a bright, peaceful and prosperous future in which all humans have the opportunity to thrive and build a better civilization. This book is powerful and essential reading for all people concerned with the future of humanity and planet
