Calculate how much light you need. Measure the room in metres and multiply the length by the width. Then multiply this number by 250. This will give you a total recommended amount of lumens needed to light this space. Use LED bulbs when applicable to ensure a high output of light.

Bathroom Lighting: The Definitive Guide | Bathroom Lights---

Often overlooked, lighting is equally as important as these. This home theater lighting definitive guide covers how lighting affects the home theater movie experience, types of home theater lighting, why to eliminate unwanted or distracting light in a home theater, and how to choose the right type of home theater lighting for your unique space and budget.

Home Theater Lighting—The Definitive Guide

Firstly, LED lighting uses up to 90% less energy than incandescent and halogen bulbs, and up to 60% less energy than CFL bulbs – which were the first energy-efficient bulbs to be widely sold. This can vary according to the type of fitting chosen, but the LED remains the leader when it comes to efficiency.

The Definitive Guide to LED Light Bulbs and Spotlights---

An LED lamp or LED light bulb is an electric light for use in light fixtures that produces light using one or more light-emitting diodes (LEDs). LED lamps have a lifespan many times longer than equivalent incandescent lamps, and are significantly more efficient than most fluorescent lamps, with some LED chips able to emit up to 303 lumens per watt (as claimed by Cree and some other LED manufacturers).
