"Native Roads should be in the vehicle of everyone who does any driving around in what we call Indian Country."--Tony Hillerman

Despite the tendency of scholarship to rely on accounts of religious women written by men, members of female religious houses or orders were active participants in the religious dialogues of the late Middle Ages and wrote extensively about themselves. This study draws on literary material on church reform produced by German-speaking communities of Italy, Switzerland, Germany and the Low Countries, from a female perspective. In particular, Anne Winston-Allen focuses on the Observant movement which originated in Italy in the 14th century and sought to 'revive piety and reform religious orders'. Through exploring what it was that women wrote about themselves, religious reform, piety and spirituality, she gains a better understanding of the reasons why women supported or opposed the reform and how they portrayed themselves in this process.

Quick Calculus 2nd Edition A Self-Teaching Guide Calculus is essential for understanding subjects ranging from physics and chemistry to economics and ecology. Nevertheless, countless students and others who need quantitative skills limit their futures by avoiding this subject like the plague. Maybe that's why the first edition of this self-teaching guide sold over 250,000 copies. Quick Calculus, Second Edition continues to teach the elementary techniques of differential and integral calculus quickly and painlessly. Your "calculus anxiety" will rapidly disappear as you work at your own pace on a series of carefully selected work problems. Each correct answer to a work problem leads to new material, while an incorrect response is followed by additional explanations and reviews. This updated edition incorporates the use of calculators and features more applications and examples. ".makes it possible for a person to delve into the mystery of calculus without being mystified." --Physics Teacher

This book presents the use of a microprocessor-based digital system in our daily life. Its bottom-up approach ensures that all the basic building blocks are covered before the development of a real-life system. The ultimate goal of the book is to equip students with all the fundamental building blocks as well as their integration, allowing them to implement the applications they have dreamed up with minimum effort.

Embrace and revel in the stories of the toughest cyclists of all time, told by The Velominati,

originators of The Rules. Read and get ready to ride . . . In cycling, suffering brings glory: a rider's value can be judged by their results, but also by their panache and heroism. Prepared to be awed and inspired by Chris Froome riding on at the Tour de France with a broken wrist or Geraint Thomas finishing it with a broken pelvis. In The Hardmen the writers behind cycling superblog Velominati.com and The Rules will tell the stories and illuminate the myths of not just the greatest cyclists ever, but the toughest. From Eddy Merckx to Beryl Burton, and from Marianne Vos to Edwig Van Hooydonk, the book will lay bare the secrets of their extraordinary and inspirational endurance in the face of pain, danger and disaster. After all, suffering is one of the joys of being a cyclist. Embrace climbs, relish the descents, and get ready to harden up.
