supplemented by a CD, with over 170 Mathcad® scripts ... suitable for self-learning by scientists or engineers who would like to refresh their knowledge of optics. ...

Optics - Learning by Computing, with Examples Using ...

Intended for a one-semester course in optics for juniors and seniors in science and engineering, this book creates a simulated laboratory where students can learn by exploration and discovery instead of passive absorption. The text covers all the standard topics of a traditional optics course, including: geometrical optics and aberration, interference and diffraction, coherence, Maxwell's equations, wave guides and propagating modes, blackbody radiation, atomic emission and lasers, optical ...
