This book examines the inter-relationship between music learning and teaching, and culture and society: a relationship that is crucial to comprehend in today's classrooms. The author presents case studies from diverse music learning and teaching contexts – including South India and Australia and online learning environments – to compare the modes of transmission teachers use to share their music knowledge and skills. It is imperative to understand the ways in which culture and society can in fact influence music teachers' beliefs and experiences: and in understanding, there is potential to improve intercultural approaches to music education more generally. In increasingly diverse schools, the author highlights the need for culturally appropriate approaches to music planning, assessment and curricula. Thus, music teachers and learners will be able to understand the diversity of music education, and be encouraged to embrace a variety of methods and approaches in their own teaching. This inspiring book will be of interest and value to all those involved in teaching and learning music in various contexts.

Originally published in 1924, this book is the result of many years' quiet thought and observation in connection with the authors own teaching. It focuses mainly on the essential skills of violin playing, rather than on the peculiarities that all players adopt to suit their own requirements. The book contains broad common-sense views, preferring not to concentrate on any particular "school" or "method". Written with some humour and in a very colloquial style it will prove to be a refreshing read, and is fully supported with detailed diagrams and photographic plates. This book is highly recommended for inclusion on the bookshelf of any amateur or professional violin player.

Annotation: The Index is published in two physical volumes and sold as a set for \$250.00. As America's geography and societal demands expanded, the topics in The Etude magazine (first published in 1883) took on such important issues as women in music; immigration; transportation; Native American and African American composers and their music; World War I and II; public schools; new technologies (sound recordings, radio, and television); and modern music (jazz, gospel, blues, early 20th century composers) in addition to regular book reviews, teaching advice, interviews, biographies, and advertisements. Though a valued source particularly for private music teachers, with the de-emphasis on the professional elite and the decline in salon music, the magazine ceased publication in 1957. This Index to the articles in The Etude serves as a companion to E. Douglas Bomberger's 2004 publication on the music in The Etude. Published a little over fifty years after the final issue reached the public, this Index chronicles vocal and instrumental technique, composer biographies, position openings, department store orchestras, the design of a successful music studio, how to play an accordion, recital programs in music
