Musical Worlds in Yogyakarta is an ethnographic account of a vibrant Indonesian city during the turbulent early post-Soeharto years. The book examines musical performance in public contexts ranging from the street and neighbourhood through to commercial venues and state environments such as Yogyakarta's regional parliament, its military institutions, universities and the Sultan's palace. It focuses on the musical tastes and practices of street workers, artists, students and others. From street-corner jam sessions to large-scale concerts, a range of genres emerge that cohere around notions of campursari ("mixed essences") and jalanan ("of the street"). Musical worlds addresses themes of social identity and power, counterpoising Pierre Bourdieu's theories on class, gender and nation with the author's alternative perspectives of inter-group social capital, physicality and grounded cosmopolitanism. The author argues that Yogyakarta is exemplary of how everyday people make use of music to negotiate issues of power and at the same time promote peace and intergroup appreciation in culturally diverse inner-city settings.

Samanta Chandra Sekhar (1835- 1904) occupies a special position in Ancient Indian Astronomy, being the last link in a long chain of illustrious astronomers commencing with Aryabhata (5th century AD). The book describes how he identified errors accumulated over the ages, eradicated them and brought the subject to final perfection. The discovery of the three anomalies in the motion of the moon, hiking of the Earth-Sun distance by more than ten times the value taken by his predecessors and his novel planetary model with heliocentric motion of the planets are some of his major contributions. How astronomy developed in ancient civilizations of the world, and the frontier topics in astrophysics like Dark Matter etc. discussed in a few articles help in developing an integral perspective of the reader.
