Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.

This book confirms and builds on the Temporal Single-System Interpretation's demonstration of Marx's consistency. This book shows that he used his theory of value to explain capitalists' accounts, and concludes that explaining accounting justifies Marx's claim that he had "proved" his theory of value.

Using real-world examples to thoroughly involves readers with financial statements, Financial Reporting and Analysis, 9e builds skills in analyzing real financial reports through statements, exhibits, and cases of actual companies. Emphasis is placed on the analysis and interpretation of the end result of financial reporting -- financial statements.

Volume 20 of Research on Professional Responsibility and Ethics in Accounting brings together a range of articles exploring the professional responsibilities of accountants, codes of conduct which affect them, and securities regulations.
