This book probes the complex methodological choices facing social researchers and students who are applying or learning the methods of social research. The author shows how an understanding of social research requires close consideration of the underlying conceptual frameworks - from neopositivism to structuralism, hermeneutics and anti-foundationalism - that shape how one studies society. Baranov introduces each philosophical tradition and shows how decisions about research design and methodology are affected by them. He also explains the practical and ethical consequences that follow from methodological choices. The book's approach is non-doctrinaire and the prose

quantitative methods to organize the chapters. While some chapter authors rely more on one or the other, many employ multiple methodologies to investigate particular problems and questions. Further, the book is not organized into single, contradictory positivist-interpretivist categories of research; chapter authors often situate methodologies within a variety of, and sometimes multiple, theoretical positions, particularly as these approaches are shaped by the historical context of social science research. Focus points in Foundations for Research: Methods of Inquiry in Education and the Social Sciences: *research ethics. *intertwined relationship of theory and research design. *systematic examination of ways to design and implement high-quality, trustworthy research across varying research designs. *specific methods for implementing

It differs from other existing texts in that equal treatment has been given to three topics which are usually either treated separately or given different amounts of attention: theory construction, the use of statistics, and the procedures of social research (generally known as "research methods").

Foundations of Qualitative Research introduces key theoretical and epistemological concepts replete with historical and current real-world examples. Author Jerry W. Willis provides an invaluable resource to guide the critical
