Earning the moniker: "sustainable southern". Southern Connecticut State University (nicknamed "Southern"), is located in New Haven, Connecticut, and is one of 17 institutions in the Connecticut State Colleges and Universities System. Founded in 1893 as a teacher's college, Southern may be the system's third-oldest campus, but its current community of some 11,000 students, faculty, and staff certainly isn't living in the past.

Challenge the status quo, change the face of activism, and confront climate change head on with the ultimate blueprint for taking action. Xiuhtezcatl Martinez is a 16-year-old climate activist, hip-hop artist, and powerful new voice on the front lines of a global youth-led movement. He and his group the Earth Guardians believe that today's youth will play an important role in shaping our future. They know that the choices made right now will have a lasting impact on the world of tomorrow, and people--young and old--are asking themselves what they can do to ensure a positive, just, and sustainable future. We Rise tells these stories and addresses the solutions. Beginning with the empowering story of the Earth Guardians and how Xiuhtezcatl has become a voice for his generation, We Rise explores many aspects of effective activism and provides step-by-step information on how to start and join solution-oriented movements. With conversations between Xiuhtezcatl and well-known activists, revolutionaries, and celebrities, practical advice for living a more sustainable lifestyle, and ideas and tools for building resilient communities, We Rise is an action guide on how to face the biggest problems of today, including climate change, fossil fuel extraction, and industrial agriculture. If you are interested in creating real and tangible change, We Rise will give you the inspiration and information you need to do your part in making the world a better place and leave you asking, what kind of legacy do I want to leave?

Is our imagination adequate to the realities of global warming? The novelist Amitav Ghosh argues that we need art and literature to help us imagine our future in the Anthropocene, but that they are falling short of the task. If culture cannot help us see the realities of our plight, then our era, which so congratulates itself on its self-awareness, may come to be known as the time of the Great Derangement. A case in point is fiction, which is so committed to normalcy and the everyday that it has no space for the improbability of climate change events the persistent droughts, hundred-year storms, and freakish tornadoes. Our politics, likewise, seems unable to mobilize forcefully in response to climate change. Ghosh argues that politics, like literature, has become a matter of individual moral reckoning, a journey of the solitary conscience rather than an arena of collective action. But to limit fiction and politics to individual moral adventure comes at a great cost. The climate crisis asks us to imagine other forms of human existence a task to which fiction, Ghosh argues, is the best suited of all cultural forms. A powerful nonfiction work by one of our most gifted, historically attuned novelists, "The Great Derangement "brings a fresh urgency to thinking on climate change. "

In a 50-room building that housed Connecticut's Civil War orphans, the University of Connecticut began in the fall of 1881 as the Storrs Agricultural School. From this beginning comes a rich history of change that continues through the billion-dollar program known as UConn 2000. In these pages are many previously unpublished and many long-unseen images that chronicle 120 years of that transformation. Each era in the university's history has seen growth and change: the 1890s, when faculty and administration squared off in the "the war of the rebellion"; 1908 to 1928, when President Charles L. Beach changed the curriculum and fought for "the needs of the college"; the 27-year administration of Albert N. Jorgensen, which saw a small college become a major research university; the 1960s, when, under Homer Babbidge Jr., the university made great academic advances while facing the sociopolitical challenges of the times; and today, when unprecedented changes are rebuilding and enhancing Connecticut's flagship university.

Before March 2011 only four coaches had ever won the NCAA men's basketball championship three times or more. That month, with the culmination of the famous "March Madness," the University of Connecticut's Jim Calhoun became the fifth. In twenty-five years at UConn, coach Jim Calhoun changed a team, a university, a state, and college basketball. Shock the World is a riveting season-by-season, game-by-game, and player-by-player biography of Jim Calhoun's winning program. It paints a vivid portrait of college basketball in the last twenty-five years and highlights the challenges Calhoun overcame to become the best program builder of all time, and the greatest coach of his generation. Calhoun's Huskies show that spirit, fortitude, and perseverance are keys to winning in modern collegiate sports, just as they are the keys to overcoming challenges off the court. At the end of the 2010 season an NCAA investigation, penalties, and few returning players threatened an end to the Calhoun era. Despite these obstacles, Calhoun, point guard Kemba Walker, and a group of freshmen led UConn to a win at the Maui Invitational in November, and UConn became the first team to capture its conference tournament by winning five games in five days. They went on to a thrilling win in the championship, making this period in the Calhoun era one of great resilience and an enduring monument to Husky pride.

Sustainable investing is a rapidly growing and evolving field. With investors expressing ever greater interest in environmental, social, and governance (ESG) metrics and reporting, companies face a sustainability imperative and the need to remake their business models to respond to an array of pressing issues including climate change, air and water pollution, racial justice,

workplace diversity, economic inequality, privacy, corporate integrity, and good governance. From equities to fixed income and from private equity to impact-investing, investors of all kinds now want to understand which companies will be marketplace leaders in a business future redefined by sustainability. Thus, investment strategies, risk models, financial vehicles, applications, data, metrics, standards, and regulations are all changing rapidly around the world. In an effort to better understand the current status and movement of this dynamic field and to provide a practical reference for the growing pool of investors, financial advisors, companies, and academics seeking information on sustainable investing and ESG reporting, this edited book covers the latest trends, tools, and thinking. It showcases the work of authors from leading companies and academic institutions across a range of vital topics such as financial disclosure, portfolio assessment, ESG metrics construction, and law as well as regulation. Readers of the book will be better able to identify and address the hurdles to moving mainstream capital toward more sustainable companies, investments, and projects.

Introduction to Public Relations: Strategic, Digital, and Socially Responsible Communication presents a comprehensive introduction to the field of public relations (PR) with a focus on new media and social responsibility. Recognizing that the shifts in technology, business, and culture require a fresh approach, authors Janis Teruggi Page and Lawrence J. Parnell show students how today's PR professionals create persuasive messages with modern technologies while working in line with the industry's foundations. The authors balance this approach with a focus on understanding communication theory, history, process, and practice, and how all these concepts can be applied to strategic PR planning. The Second Edition features new and refreshed content throughout, including cases, chapter-opening scenarios, and profiles of both young and senior practitioners with tips and career guidance for student success. Included with this title: The password-protected Instructor Resource Site (formally known as SAGE Edge) offers access to all text-specific resources, including a test bank and editable, chapter-specific PowerPoint® slides. This volume clearly distinguishes Indigenous environmental justice (IEJ) from the broader idea of environmental justice (EJ) while offering detailed examples from recent history of environmental injustices that have occurred in Indian Country. With connections to traditional homelands being at the heart of Native identity, environmental justice is of heightened importance to Indigenous communities. Not only do irresponsible and exploitative environmental policies harm the physical and financial health of Indigenous communities, they also cause spiritual harm by destroying land held in a place of exceptional reverence for Indigenous peoples. With focused essays on important topics such as the uranium mining on Navajo and Hopi lands, the Dakota Access Pipeline dispute on the Standing Rock Indian Reservation, environmental cleanup efforts in Alaska, and many other pertinent examples, this volume offers a timely view of the environmental devastation that occurs in Indian Country. It also serves to emphasize the importance of self-determination and sovereignty in victories of Indigenous environmental justice. The book explores the ongoing effects of colonization and emphasizes Native American tribes as governments rather than ethnic minorities. Combining elements of legal issues, human rights issues, and sovereignty issues, Indigenous Environmental Justice creates a clear example of community resilience in the face of corporate greed and state indifference.

This systematic philosophical study of self-expression explores the ways in which it reveals our states of thought, feeling, and experience. Green defends striking new theses on such topics as our ability to perceive emotion in others, artistic expression, empathy, expressive language, meaning, facial expression, and speech acts.
